WE PACK GOODNESS. YOU DELIVER TRUST.

FOOD SAFE | LEAK PROOF | KEEP FRESH | RECYCLE RESPONSIBLY

WHO WE ARE

A TRUSTED ASEPTIC PACKAGING PARTNER

Goodness Assured

Trust Pack manufactures aseptic packaging material for food and beverage producers who can't afford to gamble on freshness. UHT milk, fruit juice, plant-based drinks, soups and cream: our material keeps flavour, nutrition and shelf life intact without a refrigerator anywhere in the chain.

We print and laminate every reel to the same standard, then ship it ready to run on your filling line. What your customer picks up off a shelf carries your brand, your colours, your artwork. The protection built into the material underneath is the part they never have to think about.

ECO-FRIENDLY | FOOD SAFE | HIGH QUALITY

MADE FOR YOUR LINE

Reels arrive printed, laminated and slit to your carton width — ready to run on standard aseptic filling machines.

MADE FOR YOUR SHELF

Custom formats, sizes and print finishes so each SKU stands out in a crowded chiller or ambient aisle.

BUILT AROUND WHAT'S INSIDE.

Each product spoils differently. We match the structure, the barrier and the opening to the liquid you are filling.

UHT Milk Packaging

Aseptic material built for ultra-high-temperature milk. Six bonded layers keep out the light and oxygen that turn fresh milk stale, holding taste and nutrition for 6 to 9 months at room temperature.

Juice Packaging

Aseptic material engineered for fruit juices and nectars. The aluminum barrier blocks the light and oxygen that degrade color and vitamin C, preserving taste and nutritional value for up to 12 months without refrigeration.

Plant-Based Beverage Packaging

Almond, oat, soy, and coconut beverages require aseptic protection from light and a separation layer to stay safe. Our cartons provide just the right thing for your product.

Soup Packaging

Heat-resistant packaging for liquids that can withstand heat treatment and transportation. It keeps ready-to-heat soups safe without preservatives.

Coffee Packaging

Packaging developed for ready-to-drink coffee and coffee-based beverages. A sealed multi-layer barrier retains the volatile aroma compounds and roast character that define your blend.

Cream Packaging

High-fat products spoil fast when exposed to air. Our cream cartons combine a tight barrier with a clean-pour opening; reliable on the shelf, easy in the kitchen.

SPECIFICATIONS

EVERY PACK, ON THE RECORD.

Goodness Assured

Standard material structure: printed paperboard, water-based inks, polymers and aluminium foil. Carton dimensions, reel width and creasing layout are confirmed on your filling machine specification.

PACK	FORMAT	VOLUME	CLOSURE	TYPICAL APPLICATION
Trust Brick 125	Brick	125 ml	Straw hole	Milk, juice, dairy drinks, cream, sauces & other liquid products
Trust Ultra 180	Slim	180 ml	Straw hole	Milk, juice, dairy drinks, cream, sauces & other liquid products

Trust Prisma 1000	Prisma	1000 ml	T-cap	Milk, juice, dairy drinks, cream, sauces, cheese & other liquid products

MATERIAL STRUCTURE

- Printed paperboard from responsibly managed forests
- Water-based inks, flexographic print
- Food-grade polymer layers
- Aluminium foil barrier

PERFORMANCE

- Blocks 100% of light and oxygen
- Shelf life 3–12 months at room temperature
- Consistent seal integrity and barrier strength
- Recyclable where carton collection exists

T-CAP

Resealable one-piece cap on 1000 ml Prisma — clean pour, no drip, easy on the shelf.

STRAWS & OPENINGS

Straw-hole packs are compatible with your existing straw applicator, paper or plastic.

OUR PORTFOLIO

FOUR FORMATS. SEVEN SIZES.

Goodness Assured

From portion packs to family packs — our formats are designed to suit every consumer segment and market need. Pick the closest match; our team refines the choice with you before anything is quoted.

DESIGNED TO PRINT. ENGINEERED TO PERFORM.

Precision In Every Line

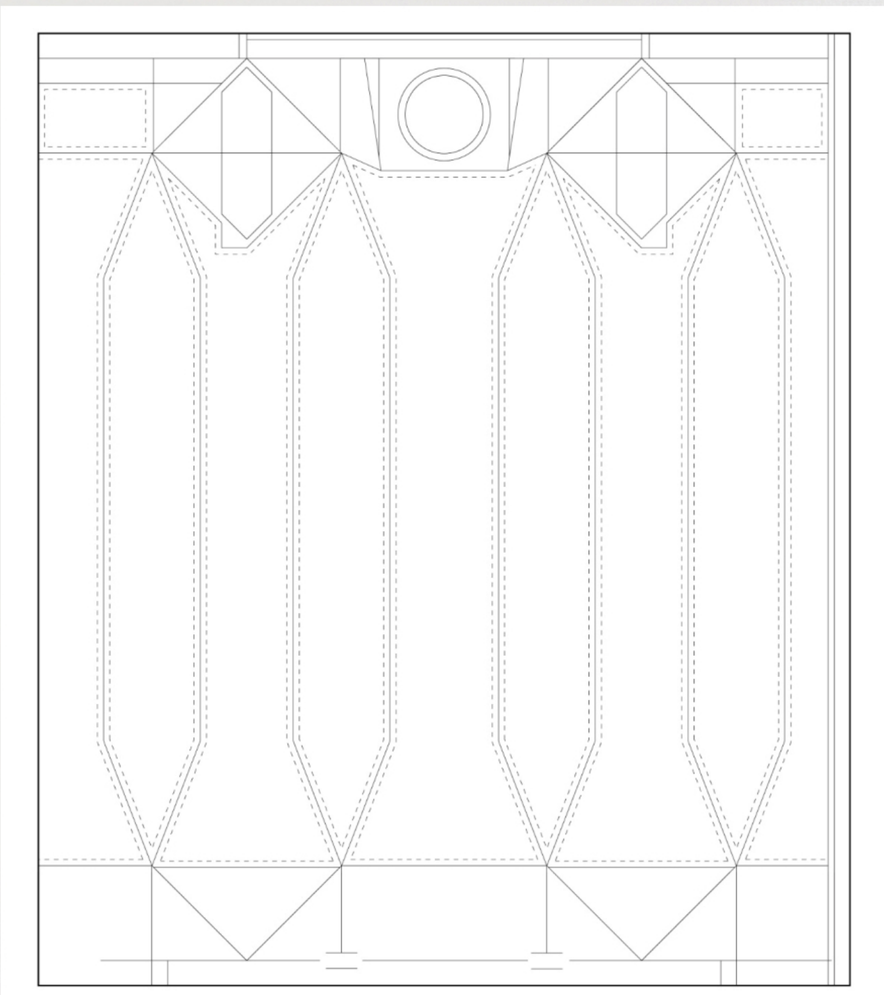

Every fold, panel, crease and sealing area is carefully engineered in the layout to achieve accurate dimensions and consistent carton geometry.

Perfect Print & Forming

The keyline is developed with printing and converting requirements in mind, ensuring precise artwork registration, clean cutting and accurate folding.

Ready For Aseptic Filling

Our carton design is engineered for smooth integration with aseptic filling machines, supporting consistent forming, efficient production and dependable pack performance.

From NATURE to NURTURE

THE ASEPTIC PACKAGING LIFECYCLE.

1. RENEWABLE SOURCING

Responsible sourcing of wood from sustainably managed forests.

FSC

2. PAPERBOARD PRODUCTION

Wood is turned into high-quality paperboard in a sustainable process.

3. PACKAGING PRODUCTION

Paperboard is printed, cut and formed into aseptic packs.

4. FILLING & PACKING

Packs are filled with safe and nutritious products in advanced aseptic filling machines.

5. CONSUMPTION

Safe, nutritious and long-lasting products reach millions of happy consumers.

6. COLLECTION

Used packs are collected through community programs and collection partners.

7. RECYCLING

Packs are sorted, cleaned and processed into paper pulp, aluminum and polymer.

8. NEW PRODUCTS

Recycled materials are used to create new paper products and everyday items.

CIRCULAR. RESPONSIBLE. RELIABLE. TRUST PACK.

Goodness Assured, Today. Tomorrow. Always.

RENEWABLE SOURCES | LESS WASTE MORE VALUE | CIRCULAR ECONOMY | LOWER CARBON FOOTPRINT | BETTER PLANET GREENER FUTURE

TRUST PACK – PACKAGING TODAY FOR A BETTER TOMORROW.

Goodness Assured

SIX BONDED LAYERS. ONE JOB EACH.

A carton looks simple from the outside. Inside, it is six bonded layers that together block light, oxygen, moisture and bacteria — the four things that spoil food. That is why an aseptic carton can sit on a shelf for months and still open fresh.

01 OUTER PE LAYER

Protects the print and keeps external moisture off the board.

02 PRINTED PAPERBOARD

Gives the pack its stiffness, shape and brand surface. Roughly 70% of the carton.

03 LAMINATION PE LAYER

Bonds board to foil under controlled heat and pressure.

04 ALUMINIUM FOIL

Thinner than a human hair. Blocks light and oxygen the real reason shelf life holds.

05 INNER PE LAYER 1

Adhesion layer that locks the foil to the food-contact film.

06 INNER PE LAYER 2

Food-contact surface. Seals the pack and keeps the product away from every other layer.

100% LIGHT & OXYGEN BLOCK

The aluminium barrier stops the two elements that destroy color, vitamin C and Flavor.

3–12 MONTHS AMBIENT

UHT milk holds 3 months at room temperature; juices and nectars up to 12.

NO COLD CHAIN NEEDED

Store and ship without refrigeration lower energy cost across the whole chain.
